DETAILED ACTION

Response to Arguments

Applicant's arguments and amendments filed 4/4/2007 are of record, but after further review of the claims, it is noted that the application is to be subject to the following restriction requirement:

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1,2,5-14 are drawn to a chuck assembly.

Group II, claims 26-28, drawn to a match network.

Group III, claims 29, 30, 32-34 drawn to a method of using a match network

Group IV, claims 15-17, 19-25, 35 and 36 drawn to a plasma reactor

2. The inventions listed as Groups I, II, or IV (all constitute an apparatus) and III (a method) do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13:2, they lack the same or corresponding special technical features for the following reasons: none recite minimizing the impedance as these groups can equalize or maximize the impedance.

Art Unit: 1763

3. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: an inductor is lacked from the chuck assembly
4. The inventions listed as Groups I and IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: a vacuum pump and plasma reactor are lacked from the chuck assembly.
5. The inventions listed as Groups II and IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: an inductor is lacked from the match network.
6. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In

Art Unit: 1763

either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sylvia R. MacArthur whose telephone number is 571-272-1438. The examiner can normally be reached on M-Th during the hours of 8 a.m. and 4:30 p.m..
